- **Certifications** – Certified ScrumMaster (CSM) | Salesforce Certified Administrator | Agile Fundamentals (Scrum & Kanban)

Professional Experience

Project Manager **Matchbook AI** 📅05/2023 - Present 📍Pune

- Coordinated end-to-end implementation and delivery of SaaS and IT projects, supporting project planning, client onboarding, stakeholder alignment, scope definition, timelines, budgets, resource allocation, and governance to ensure successful project execution and seamless transitions from planning through release and hypercare.
- Led project kick-off meetings with business stakeholders, Product Owners, leadership, and delivery teams to establish project objectives, execution strategies, success criteria, and implementation readiness while facilitating regular client and stakeholder meetings to communicate progress, manage expectations, and address delivery risks.
- Managed project schedules, deliverables, dependencies, risks, change requests, and implementation issues by collaborating with cross functional teams, including Business, Product, Development, QA, and Engineering, serving as the primary coordination point to drive timely issue resolution and successful project delivery.

- Facilitated Agile Scrum ceremonies including Daily Stand-ups, Sprint Planning, Sprint Reviews, Sprint Retrospectives, and Backlog Refinement, partnering with Product Owners to prioritize backlogs, support release planning, and ensure sprint execution aligned with business objectives.
- Leveraged Jira and Confluence to monitor sprint performance, backlog health, velocity, burn-down charts, user stories, project impediments, and governance metrics, enabling data-driven decision-making and continuous process improvement.
- Led matrix-managed cross-functional teams of 8–10 members while maintaining project governance artifacts including RAID logs, Change Request logs, project plans, status reports, executive dashboards, sprint documentation, and meeting minutes to ensure compliance, audit readiness, and transparent stakeholder communication.

PMO Process Lead Infosys BPM 📅04/2019 - 05/2023 📍 Pune

- Managed PMO operations supporting multiple client implementation projects, including onboarding, resource planning, stakeholder coordination, governance, invoicing, and transition activities to ensure successful project execution.
- Coordinated end-to-end client implementation support by partnering with Project Managers, Client Partners, Functional Managers, Recruitment Teams, and business stakeholders to facilitate onboarding, project planning, staffing, execution, and delivery. Facilitated Agile Scrum ceremonies, monitored project risks, issues, dependencies, and delivery status, and supported timely resolution of blockers to ensure successful project outcomes.
- Developed and maintained executive dashboards, project reports, and governance artifacts, including SOWs, SLA reports, Quality, Productivity, DSAT, AHT, KRA metrics, project documentation, and repository management, enabling data-driven decision-making.
- Served as an escalation point for operational and project issues by coordinating with cross-functional teams to ensure timely issue resolution and minimal delivery impact.
- Led team coordination and operational excellence through training, coaching, performance monitoring, interview scheduling, escalation management, and continuous process improvement, ensuring optimal resource utilization and compliance with organizational standard.

Associate (Amazon Development centre) 📅05/2017 - 03/2019 📍 Pune

- Managed customer support requests and operational escalations while collaborating with internal teams to deliver timely issue resolution and maintain high client satisfaction.
- Investigated customer concerns through historical case analysis, research, and stakeholder coordination
- Maintained detailed documentation of customer interactions and resolution activities
- Prepared operational reports and analysed key performance indicators including DSAT, AHT, quality scores, productivity metrics, and EOD reports
- Supported escalation management, process compliance, and daily operational reviews
- Collaborated with internal teams to improve customer experience and service delivery outcomes
- Developed strong communication, problem-solving, stakeholder management, and process improvement skills

Key Accomplishments

- Successfully coordinated end-to-end SaaS implementation and Agile project delivery, ensuring smooth client onboarding and timely execution through effective stakeholder collaboration.
- Led Agile Scrum ceremonies and managed project governance through RAID logs, executive dashboards, Jira, and Confluence, improving project visibility and delivery coordination.
- Managed cross-functional teams of 8–10 members, fostering collaboration across Business, Product, Development, QA, and Engineering to achieve successful project outcomes.
- Enhanced PMO operational efficiency by driving executive reporting, resource coordination, risk tracking, and continuous process improvement across multiple client implementation projects.
