Raam Bhanushali

Summary

As a current student pursuing a diploma in IT, I am a 3rd-year student looking to apply my basic knowledge in a practical setting through an internship. I am passionate about basic web development in IT, and my aim is to become a full-stack developer. I am excited about the opportunity to learn and contribute to your team. I am looking forward to acquiring knowledge about upcoming projects or events through an internship. I have completed my diploma in IT at the end of April this year, and if given the opportunity to join your organization, I am committed to contributing positively and striving for excellence in all endeavors.

Experience

Raam - Internship Student

Ahmedabad, India

- I worked in the Hackathon (2023).
- Participated in the two tech fests (Innovation Village) provided by the college.
- One internship was completed in Ahmedabad at INNOVIUS SOFTWARE.
- Developed a project demonstrating CRUD operations to enhance software functionality.

Projects - Experience-1

1. Kodeless Website Builder:

Technologies used are HTML, CSS, JS, PHP (backend), and MySQL.

What does the website do?

The main purpose of the website is to create a website without requiring coding knowledge.

Project - Experience-2

2. Kodepay (web app):

Technologies used are HTML, CSS, JS,

PHP(backend), MYSQL.

What does the web app do?

The main purpose of an app is to show the simple payments between the sender and receiver.

Project - Experience-3

3. A chatbot:

The technologies used are HTML, CSS, JS, Python, and API (Gemini).

What does the bot do?

The main purpose of the chatbot is to provide code according to the user's requirements, but only technical code.
